

# Note our Ad and Advantage

## Unified<sup>®</sup> Screening & Crushing

*Uniting the benefits  
Delivering the quality*

# Our network is designed to increase your production.

### Expert Advice When You Need It

- Local screening, crushing and sizing experience
- Experience with all kinds of throughput: sand and gravel, crushed rock, special mining applications...for all sized operations

### Massive Inventory on Hand

- Largest warehoused inventory of manganese
- Extensive selection of crushing parts and screening media
- Unified is able to deliver the right product at the right time – as you need it

### Local Distribution Saves Time and Money

- Faster delivery service
- Reduced transportation costs
- Local support

The Unified service network includes expertise, inventory and delivery...with just one call.

# You can always expect more from us.

## more locations

### Unified Screening & Crushing locations:

- California Wire Cloth
- California Wire Cloth – Las Vegas
- Carolina Wire & Castings
- Colorado Wire Cloth
- Diamondback Castings
- Michigan Wire Cloth
- Ohio Wire Cloth
- Polythane of Virginia
- Razorback Screen Services
- Texas Wire
- Twin City Wire
- Wasatch Wire
- Wisconsin Wire Cloth

### Our distribution network includes:

- Rung Industries – Seattle, WA
- Compass Wire Cloth – Westville, NJ
- Size Enterprises – Coral Gables, FL
- American Screen and Crusher – Alabaster, AL
- Central Service & Supply – Ankeny, IA

We partner with you by sharing our expertise to find solutions for your unique applications.

Special pricing, customer R&D and trial prototypes are available.

## more inventory

- Woven Wire Cloth
- Urethane-screening media and wear parts
- Rubber-screening media and wear parts
- Manganese-crushing and wear parts
- Perforated Plate
- Screen Rails – Steel, Rubber Clad & Urethane
- Conveyor Parts & Other Screening Accessories

## more expertise to increase your productivity

- Providing solutions for all screening and sizing problems

## The bottom line ADVANTAGE

**Kramer Mining & Materials – Minneapolis, MN Area**

### Problem:

Every 2 to 4 months the Kramer Mining & Materials Quarry of Burnsville, MN, had to change-out their 1 ½" opening wire screens, on the top deck of their 6' X 16' triple deck processing machines.

### Recommendation:

Unified suggested replacing the 1 ½" opening (¾" oil-tempered wire cloth) with screens made from their proprietary Tufflex™ material. The Tufflex high tensile strength, increased ductility, and corrosion resistance make it a good fit for high impact and abrasive processes.

### Results:

Screen wear-life doubled, change-outs and overtime expense were cut in half. Tufflex was then tried on a ¾" X 2" opening – 0.047, Stainless Steel – end tension application. "We achieved double the wear life", said Mike Strom, Quarry Supervisor... "The cost is about equal to oil-tempered, but for our applications, the savings were much greater."
