

Our products perform better on the job

Because They Are Inspired By The Job

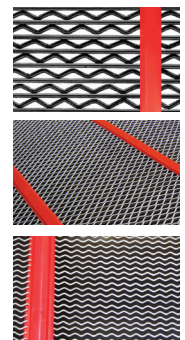

SuperFlow - Advanced combination of wire and urethane

Unified® SuperFlow screens are an innovation that provides accurate sizing with little or no blinding. This product will handle dry, damp or sticky materials when other screening media blinds over. Designed to **dramatically increase production throughput, productivity and wear life.**

Independently vibrating wires in four styles:

- **W-style:** Features alternating straight and crimped wires that vibrate at different frequencies, providing self-cleaning with high strength.
- **D-style:** Diamond openings are ideal for accurate sizing of wet and dry materials.
- **H-style:** Herringbone openings are designed for light applications where the gradation from raw to finished product is not large. H-style also prevents roots, grass and other debris from clogging the screen in recycling applications.
- **T-style:** Straight wire slots for maximum throughput when sizing is not critical.

Everything You Need To Keep Your Production Moving

Crusher Wear Parts

Polyurethane

Wire

Rubber

Inspired By The Job!

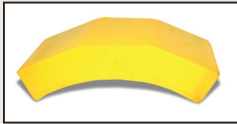

The largest inventory of ready-to-ship
Crusher Wear Parts
Jaws – Cones – Gyrotories – VSI & HSI
Impact Crusher Parts

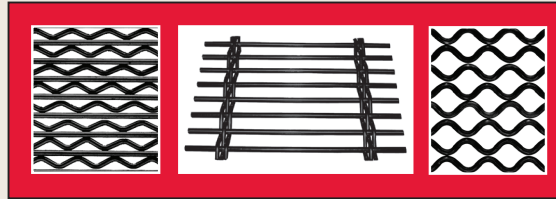

Channel Rubber
1/4", 3/8" & 1/2" standard sizes

Canoe Liners – belt & chute liners,
rubber clad with full steel backing

Pipe Patches

Clean Screens – A high quality, non-blinding
screening media made from woven wire

Belt Scrapers –
Polyurethane
& Rubber

Miniveyor – portable
conveyor systems

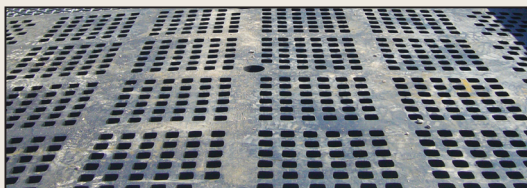

Polyurethane deck
conversion adaptors

Screen Rails offered in steel,
rubber, or urethane

Screen Tension Accessories

Rubber or Polyurethane will reduce
change outs and lower maintenance costs
