

# Unified® Wire Cloth Solutions

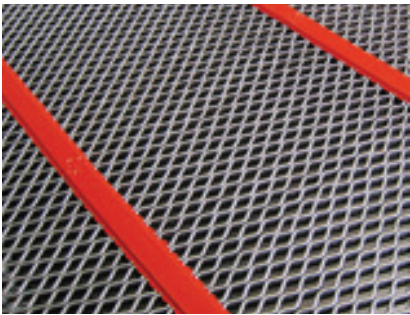

Woven in USA – High Quality Manufacturing –  
Consistent with ISO 9001-2008

## Why do they call it Tufflex?

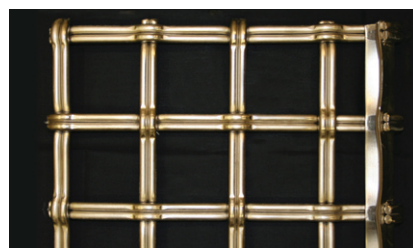

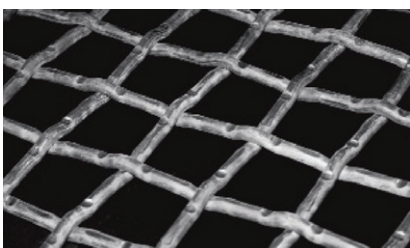

## It's the toughest wire cloth around.

Unified® Tufflex Screens offer greater ductility and the proprietary wire process which includes a two-strength, material building steps. This creates a higher tensile strength than the single-step process for oil-tempered and will provide a high impact and abrasive resistant screening. Due to this unique and patented process, Tufflex out-performs other wire types in most applications.

### SuperFlow – Woven with Tufflex

The vibrating action, combined with the high percentage of open area, makes SuperFlow an exceptionally long-lasting and self-cleaning screen. Unified engineers designed the independently vibrating wires to frequency levels that prevent material buildup and blinding while correctly sizing the specified product. Four screen styles offered for your specific needs.

### Our Steel Alloys

- High Carbon
- Tufflex/Oil Tempered
- Stainless Steel

### Other Metals and Alloys, include:

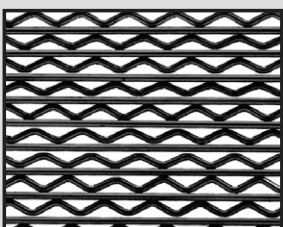

- Inconel
- Aluminum
- Monel
- Manganese
- Copper

### Unified® Offers...

More openings of different wire sizes, in-stock. We provide the most strength vs. throughput choices in North America.

**WOVEN IN THE USA**

### Some Clean Screen Opening Styles

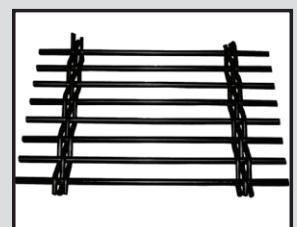

W-Syle

D-Syle

H-Syle

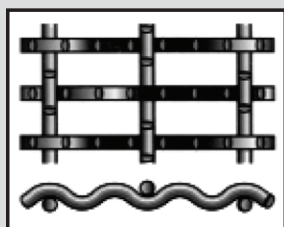

T-Syle

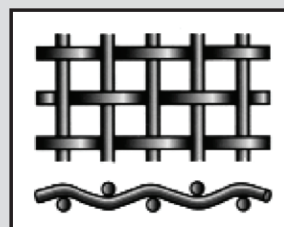

### Some of our Weave Styles

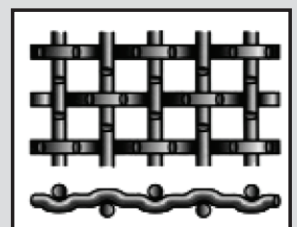

TwinWire

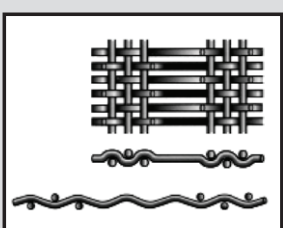

Inter-Crimp

Double-Crimp

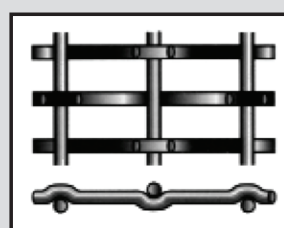

Loc-Crimp

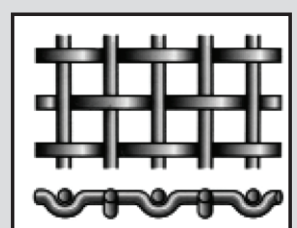

Tri-Loc/Tri-Mesh

SuperFlow

Slotted Openings

Flat Top

 **Unified® Screening & Crushing**
